The nanoglass panel a smooth and lustrous texture with a brilliant crystal-like appearance.

Nano crystallized glass

# What is Nanoglass

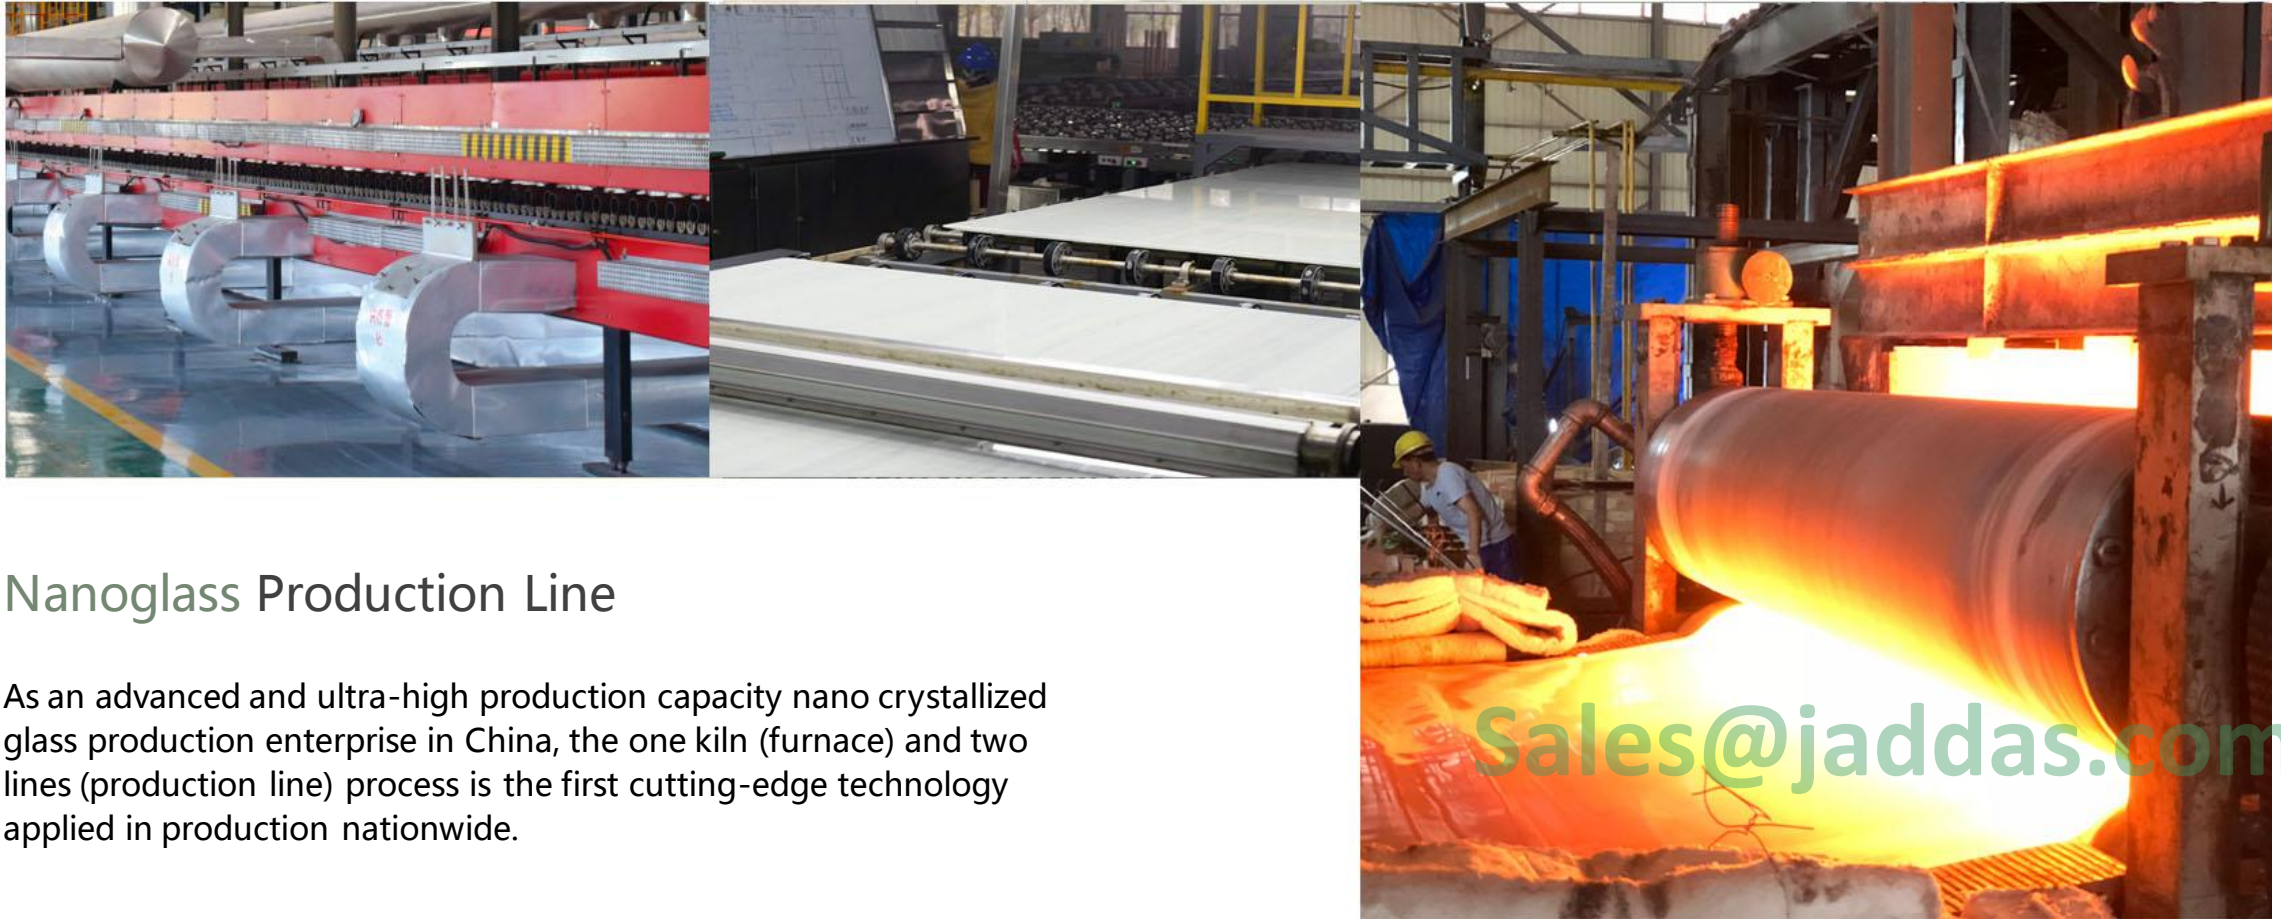

## Through-Body Nanoglass

The surface gloss is as high as 95 or more. It is smooth and soft, and the whole body is flawless. Elegant! Its excellent performance has been certified by the national professional testing organization, and its gloss, bending strength, thermal expansion coefficient and other indicators are all at the leading level in the industry.
